Services, Installation, & Warranty

Our Installation includes:

- Designated vertical piping and/or wire molding in public spaces. Power supplies, power over ethernet, network switches and all other related materials.
- One Time Networking of mobile devices, PCs and laptops for remote viewing (existing router credentials are required). Full Training of entire system
- Project handover (All documentation and Passwords to your system)
- All Software required to manage your system.
- A Dedicated Project Manager to ensure your expectations are met.

Our Warranty includes:

- One (1) Year on all equipment, labor and workmanship provided by Total Security.
- One (1) Year of Unlimited access to Remote Support and Footage Pulls
- One (1) Month to adjust camera angles at no charge.

Service after the installation:

- Simply call us at 516-775-2304
- Email us at help@totalsecurityny.com

Payment and customer responsibilities:

Our accounting department will contact you by phone and email in advance of your installation to confirm the final payment amount. Collection of the final payment is imperative on the day of completion, without exception. At Total Security discretion, should final payment not be received as agreed, activation of cameras may be delayed until final payment is made.

For Total Security to deliver a clean, high-resolution image using existing wiring said wiring must be compatible with current camera technology. Should wiring require updating, Total Security will inform the client and an additional quotation will be provided for that work. Total Security cannot be responsible for any other unforeseen situations including additional work requested once the job has begun. This agreement does not include cost or material to trouble shoot pre-existing conditions. Total Security will provide change orders for client's approval before any additional work is performed, should it be required.

Total Security does not perform wiring in elevator shafts; however, we will help to coordinate with your elevator company in advance of the installation date for the necessary wiring. Total Security will return to install elevator cameras later at no charge, should the elevator company not be available during our scheduled installation and therefore is not a reason to withhold final payment on the day of completion. Training is provided by our technicians at the completion of our work and is available any time remotely thereafter. Connectivity to and from mobile devices, laptops or PC requires a functional Internet connection with 5MB upload speed per thirty-two cameras. Set up of remote access requires the password for your Internet router, which can and will under this agreement be performed remotely at any time after the installation, should access to the router password not be available at the time of completion and therefore is not a reason to withhold final payment on day of completion.

Customer agrees that Total Security (hereinafter referred to as "Company") is not an insurer and no insurance coverage is offered herein. The security equipment is designed to reduce certain risks of loss, though "Company" does not guarantee that no loss will occur. "Company" is not assuming liability, and, therefore shall not be liable to Customer for any loss, personal injury or property damage sustained by Customer as a result of burglary, theft, hold-up, fire, equipment failure, smoke, or any other cause, whatsoever, including any malfunction of electronics or failure to send alerts or produce backup data regardless of whether or not such loss or damage was caused by or contributed to by "Company's" negligent performance, failure to perform any obligation or strict products liability. Customer releases "Company" from any claims for contribution, indemnity or subrogation. Customer agrees that should there arise any liability on the part of "Company's" as a result of "Company's" negligent performance to any degree, failure to perform any of "Company's" obligations, equipment failure or strict products liability, that "Company's" liability shall be limited to 5% of the service call or \$250.00, whichever is greater. There is no warranty or guarantee that an incident will not occur just because security is present. We assure you any situation (including those above that arises beyond the control of our installers) will be addressed and resolved in a timely fashion under our warranty.

Responsibilities of Client:

- Promptly notify Company of any known or suspected trouble or malfunction of the system.
- Allow Company full and free access to and use of the system for purposes of this Agreement, and full and free access to and use of any additional devices or areas necessary to provide service(s) under this Agreement. Client shall also provide Company with appropriate working space, including adequate light, heat, ventilation, electricity and internet and telephone access, for Company's use in providing service(s) under this Agreement. Should the company not gain access to the premises on the scheduled date client will be charged \$175.00 above and beyond the cost of the agreement for each additional attempt to gain access to do the work.
- Designate suitable representative(s) satisfactory to the Company as exclusive contract(s) between the Company and the Client, who shall have authority to make decisions on behalf of Client concerning service of the system by the Company.
- Neither authorize or permit maintenance, repairs or modifications of any kind to be made or attempted to the system, except by the Company or as specified and approved in advance by Company.
- Maintain site environmental conditions in accordance with the specifications established by manufacturers) and/or the Company for the system.
- Make all payments and pay all charges when due and without set off of any kind, and not permit grounds to exist for insecurity of the Company about Client's ability to perform any of its obligations hereunder.

Equipment Condition:

- This Agreement is contingent upon inspection of the system by the Company and determination by the Company in its sole discretion that the system is in acceptable condition for provision of service(s) under this Agreement. Any repairs or adjustments to the system or its components deemed necessary by the Company under this Agreement, and shall be required to be provided by the Company under this Agreement, and shall be made at the expense of the Client.
- If, in the sole determination of the Company, and at any time prior to or during the term of this Agreement, the system or any portion of it cannot be adequately inspected, repaired or adjusted on-site to bring it to an acceptable level of condition, the Company shall not be required to perform further under this Agreement, and in such an event the Company shall refund any unearned monies paid by the Client to the Client. If, alternatively and in the sole

determination of the Company, portions of the system are not likely to be satisfactorily inspected, serviced or maintained through normal inspection, service and maintenance efforts, the Company may, in lieu of cancelling this Agreement, exclude them from coverage under this Agreement. In such an event, the Company shall reduce the charges under this Agreement proportionately. For those portions of the system excluded from coverage under this Agreement as aforesaid, any inspection, service or maintenance provided by the Company shall be paid for by the Client at the Company's then-prevailing rates, terms and conditions.

- This Agreement does NOT cover CCTV cameras, recording devices, router, switches, monitors etc. or related wiring installed prior to or after the Company's work was performed by a third party. Labor to repair or rerun lines not installed by the company or to replace any part of the CCTV system not installed by the company is billable separately at standard hour rates of \$205 per hour plus parts.

Exclusions:

Unless otherwise specifically agreed to herein, Company's performance under this Agreement shall not include:

- Installation of equipment, or parts and labor required to install, inspect, maintain, service or remove devices not quoted/proposed in this document.
- Service or maintenance of equipment excluded under "Equipment Condition" herein.
- Diagnosis or repair of problems other than those directly related to the quoted equipment.
- Parts or labor required to repair damage to the system from any cause other than ordinary use or any specific conditions beyond the companies control, including, but not limited to, insects or rodents infestation, environmental anomalies, fire, flood (water damage), weather related, earthquake, explosion, smoke, damage to building, strike, riot, terrorism, vandalism, acts of God, electrical failure, power surges, air conditioning or humidity control, equipment incompatibility installed by any third party, computer viruses and third party software, operator error, neglect or misuse by anyone other than those authorized by the Company in writing.
- Electrical or telephone work external to the system, painting or refinishing equipment, relocation or modification of equipment or programming of equipment.
